

# EDEN

reduces the  
impact of  
**DISASTERS**  
through  
research-based  
education.

[eden.lsu.edu](http://eden.lsu.edu)

The Extension Disaster Education Network (EDEN) links more than 200 Extension professionals with expertise in more than 75 different disciplines to use and share resources to reduce the impact of disasters.

Since 1993, EDEN's goal is to use education to reduce the impact of disasters. Because the impact of all disasters is local, the network gives county-based educators the tools they need to help communities and individuals prepare for, respond to, and recover from natural and man-made disasters.

## ONLINE RESOURCES

- Searchable database of Extension resources and educational materials tailored to help people deal with a wide range of disasters
  - Food and agricultural defense educational resources
  - Online courses and materials for Extension educators to use to develop local programs
  - Directory of Extension professionals and member institutions in all 50 states and three U.S. territories
- Internal collaboration tools for EDEN delegates and member institutions

## EXPANDING COLLABORATIONS

FEMA
